

Anarchy

The Humane Alternative to the Violence of Statehood.

Government uses violence to uphold the interests of the politically powerful.

Anarchy empowers everybody who does not rely on oppression.

Abolishing the government monopoly on law enforcement will allow people to explore limitless options for dealing with those who aggress against others.

Abolishing political privilege will reduce incentives to aggress against others.

Through mutual aid (helping each other for mutual benefit), counter-economics (trade that undermines state economic control and revenue gathering) and other voluntary action, we can build a world of liberty.

Liberty or Tyranny. Anarchy or Government. The choice will be made by each of us.
